Cookie statement

User Policy

In order to provide you with the best possible service, this website uses cookies.
Below we explain how and why this happens.

What are cookies?
When you visit this website, cookies are placed on your computer, tablet or smartphone to keep track of statistical and research data. Cookies are small, simple text files. On your next visit, the cookies are used to recognize you. Cookies ensure, for example, that when you visit our website you do not every time receive or must enter the same information. Your settings and preferences will be remembered and that makes the following visit of the site easier. In addition, thanks to cookies, the information and offers on the site can be tailored to your preferences.

What do we use cookies for?
A session cookie allows us to see which parts of the website you have viewed during this visit. We can adapt our website and services as much as possible to the surfing behavior of our visitors. These cookies are removed automatically as soon as you close your web browser.

We only place tracking cookies if you give us permission to do so. By clicking on the 'Accept cookies' button or by continuing to click on our website, you consent to the posting. A so-called tracking profile is created, which is not linked to name, address, e-mail address, as known to us. The profile allows the website to act according your preferences. Permanent cookies can be deleted via the browser.

Reject cookies
Don't want to allow cookies? You can delete cookies manually via your internet browser or have it removed automatically at the end of an internet session. You can set up the internet browser so that a message is given when a cookie is placed or set in such a way that cookies cannot be placed in some cases. In such cases you will not be able to use the website.
See also our privacy statement.

Social media
Finally, the website includes buttons from social media. The code that is used for this, is from the relevant website media. We have no influence on the further use of that information by these companies. Regularly read the privacy statement of Facebook, Twitter, Instagram and YouTube to know what they do with your (personal) data.
